Involving Residents in Outdoor Restructuring Projects

- Strengthen resilience and social cohesion
- Increase safety and trust between the tenants as well as with the property owner
- Facilitate property management
- Better investments
The initiative

- National funding to restructure outdoor residential areas
- Public and Private Property Owners
- Residential properties in socioeconomically disadvantaged areas
- Requirement of resident engagement

Urban Utveckling

- Urban planners, Geographers, Political scientists, and Anthropologists
- Community engagement & dialogue
- Place studies
- Mappings
- Evaluations
- Place branding
- Safety and accessibility

Working with the Social Aspects of Urban Planning
How to Engage the Residents and Create Value
Outdoor dialogue in Husby, Sweden
The INHERIT project (2016-2019), coordinated by EuroHealthNet, has received funding from the European Union’s Horizon 2020 research and innovation programme under grant agreement No 667364.
Engaging the Residents Creates Values!

Key Points:

• Real influence
• Early engagement - Avoid costly mistakes
• Continuous dialogue
• Information and transparency
• Managing expectations
Thank you!
